

## Another Copestake Die.

Roy Gault.

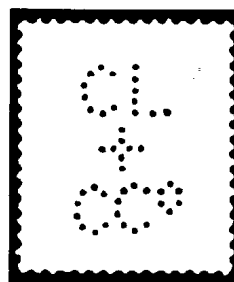

While looking through a batch of twenty-seven "CL/+CC" dies recently I noticed a variation in the spacing of the two C's on the bottom line. Just four showed the variation, and all four had dates in 1888. Analysis of the remainder gave an earliest date of 27th October 1891, and a latest date of 28th March 1899. This modifies slightly the information presented in Bulletin No.326.

C1888

C4370.01a

1890-1899

C4370.01

If anyone can further refine these 'die in use' date ranges, I would be pleased to hear from them.
